Subject: Lamprey collection in ISA -- request for schedule information
Date: 09/08/2006 02:46 PM

Hey Y'all,

As you know, we're gearing up for several Round 3 field efforts, collection of ammocetes in the ISA being the most pressing and imminent.

Barring any unforeseen obstacles, the LWG contractors intend to begin sampling on Monday, Sept. 18. They anticipate that the ISA sampling event will run for about four weeks (5-days a week for about 10 hours/day).

Given the level of interest among all parties in this particular event, Joe, Ron and Chris asked if I'd help get a better handle on that interest in their absence. In other words, I'm hoping to hear from you on when you may be available and interested in being in the field. I've attached a spreadsheet with workdays projected out through Oct. 27. With this info in hand, we'll be better able to coordinate our field observation/oversight needs.

What I need from y'all is an indication of which days you may be interested and available for fieldwork, whether it be for purposes of oversight or just an interest in learning about the effort. That said, /please send me ASAP your input using the attached file/. A 'yes' means you're interested/available for that given day. A 'no' means you can't make it.

Also, /please let me know if you have access to a boat/operator (including boat capacity and any specific days that it would or would not be available)/.

Thanks,

-R
